MAGNETIC FIELD INDICATOR SET

- Conformity to standards JB4730-94, ASTME709, ASTMA275, JB3965-85
- Used to check the magnetic powder flaw detection equipment, the comprehensive performance of the magnetic powder magnetic suspension, and whether the operation method is correct, and reflect the strength and direction of the magnetic field in the magnetized area

Code	Include
MPI-FT261	1. octagonal single sided copper: for pressure vessels and general mechanical products 2. octagonal double-sided copper: forged steel parts and general mechanical products 3. adjustable thread round: used to check the magnetic powder flaw detection equipment, the comprehensive performance of the magnetic powder magnetic suspension and operation method
